

Figure 6. Interannual variability of SCO (top) and TOR (bottom) in region over western equatorial Africa (5°-10°N) bounded by 20°W and 20°E. Upper panel shows year-to-year variation of SCO and lower panel shows interannual variability of TOR (solid lines). The red dashed lines in the plots show the average u-component of the wind at 30hPa (<0 easterly, >0 westerly) for July of each year along the X-axis.
